

### **ASSEMBLING THE RACQUET STAND**

Step 1: Unpackage the Rack Assembly and unfold one leg until the leg wire touches the upward curving wire ends of the Rack (see fig. 1). Repeat this move for the other leg.

Step 2: Take the Spreader Tray and over the lower wire of each leg to stabilize the Rack Assembly (see fig. 2), then attach the GAMMA sign (not pictured) to the side of the Rack Assembly with provided ty-raps.

NOTE: Be sure the Rack end wires are facing up or the Rack will be unstable when fully constructed.
